

BANANAS

Cardboard trays with PP flow packs

PHOTO CONDITIONS: Pictures do not show flow packs to improve the quality of the photo.

RESULTS:

Appearance: After 25 days at room temperature, bananas in reference packaging are overripe and completely brown. Bananas packed in treated trays show less ripeness and better color.

Consistency: Bananas packed in treated trays are still firm, while those in reference packaging are much softer and overripe.

TEST CONDITIONS:

25 days at room temperature

RAW MATERIAL and APPLICATION TECHNIQUE:

cartonboard 100% virgin fibres
